

FUGA

curved profiles

Explore our Ring, Round and Curved bespoke Linear lighting range. We provide the latest trends and technology in lighting, as well as proven classic styles to achieve the perfect look for your project. In some cases, a fitting can become the center of the room, bringing a space together with style and personality.

For simple, clean runs of light that fully illuminate office and commercial spaces to ensure good illumination, Bright's Rings, Rounds and Bespoke Curved Linear Lighting Profiles are available in Custom lengths for continuous lighting systems, bespoke geometric shaped feature lights with fully illuminated corners can be created upon client's request.

FUGA 2 RING SP

No matter the application, the suspended and surface Linear Lighting Profiles will provide high lumen output and bright illumination wherever it is used. This clean, refined luminaire option will ensure that any application stands out while maintaining a well-constructed, impressive visual as standard.

Digital Lighting is the fourth dimension of Architecture and Design. Our Experience in the Building process reflects in the system design and offers extra support to the clients. Custom shapes available subject to design, Incorporates European branded LED drivers, Up to 170 Lumens per watt, Direct/Indirect lighting options available for suspended fittings, Clip in gear tray for easy installation, Tunable White options, and low maintenance cost.

We love light. We understand light. We know how light can guide and focus attention. Most importantly, we understand how light affects people. BRIGTH configures your lighting solution exactly to your needs and wishes. Don't just limit what we can do to what you can see because your imagination is the real limit of what we can do – if you can draw it we can make it!
